

Government Savings Automation

Technical Evidence Appendix

Assessment Date: 20 July 2026

Mobile 2 Endpoint Inventory

ID	Method	Path	Class	Status	Execution Model
M 2-001	GET	/mobile2api/v1/mobiledashboard	MobileDashboardRequestTest	Verified automated	automated and in master regression
M 2-002	GET	/mobile2api/v1/mobileytdsummary/{ext}	MobileYtdSummaryRequestTest	Verified automated	automated and in master regression
M 2-003	GET	/mobile2api/v1/mobileactivity/{ext}	MobileActivityRequestTest	Verified automated	automated and in master regression
M 2-004	GET	/mobile2api/v1/mobiletransactionhistory/{ext}	MobileTransactionHistoryRequestTest	Verified automated	automated and in master regression
M 2-005	GET	/mobile2api/v1/investments/{ext}	MobileInvestmentRequestTest	Verified automated	automated and in master regression
M 2-006	GET	/mobile2api/v1/mobilebanks	MobileBanksRequestTest	Verified automated	automated and in master regression
M 2-007	GET	/mobile2api/v1/mobilebanks/{id}	MobileBanksRequestTest	Verified automated	automated and in master regression
M 2-008	POST	/mobile2api/v1/mobilebanks	MobileBanksRequestTest	Verified automated	automated and in master regression
M 2-009	PUT	/mobile2api/v1/mobilebanks	MobileBanksRequestTest	Verified automated	automated and in smoke only
M 2-	DELETE	/mobile2api/v1/mobilebanks	MobileBanksRequestTest	Verified	automated and in

010				automated	smoke only
M2-011	GET	/mobile2api/v1/content	MobileContentRequestTest	Verified automated	automated and in master regression
M2-012	GET	/mobile2api/v1/plans	MobilePlansRequestTest	Verified automated	automated and in master regression
M2-013	GET	/mobile2api/v1/plans/{id}	MobilePlansRequestTest	Verified automated	automated and in master regression
M2-014	GET	/mobile2api/v1/mobilecontribution	MobileContributionRequestTest	Verified automated	automated and in master regression
M2-015	GET	/mobile2api/v1/mobilecontributioncheck	MobileContributionCheckRequestTest	Verified automated	automated and in master regression
M2-016	GET	/mobile2api/v1/mobilecontribution/{ext}/{id}	MobileContributionDetailRequestTest	Verified automated	automated and in master regression
M2-017	POST	/mobile2api/v1/mobilecontribution	MobileContributionPostRequestTest	Verified automated	automated and in master regression
M2-018	PUT	/mobile2api/v1/mobilecontribution/{ext}/{id}	MobileContributionPutRequestTest	Verified automated	automated and in master regression
M2-019	DELETE	/mobile2api/v1/mobilecontribution/{ext}/{id}	MobileContributionDeleteRequestTest	Verified automated	automated and targeted/manual
M2-020	GET	/mobile2api/v1/mobilebalance/trend/{ext}	MobileBalanceTrendRequestTest	Verified automated	automated and in master

0				ated	regressio n
M 2- 02 1	GET	/mobile2api/v1/mobileperfor mance/{ext}	MobilePerformanceRe questTest	Verifie d autom ated	automate d and in master regressio n
M 2- 02 2	GET	/mobile2api/v1/mobilestackup /{id}	balancetrend.MobileSt ackupRequestTest	Verifie d autom ated	automate d and in master regressio n
M 2- 02 3	GET	/mobile2api/v1/mobileugift	MobileUgiftRequestTes t	Verifie d autom ated	automate d and in master regressio n
M 2- 02 4	PAT CH	/mobile2api/v1/mobileugift/{e xt}	MobileUgiftRequestTes t	Verifie d autom ated	automate d and in master regressio n
M 2- EX CL	GET	/mobile2api/v1/mobilemembe rs/{planId}/{username}	MobileMembersReque stTest	Exclud ed from denom inator	automate d and in smoke only

Mobile 1 Endpoint Inventory

ID	Method	Path	Class	Status
M1-001	POST	/mobile1api/v1/mobilemembersession	Mobile1AuthenticationTest	Verified automated
M1-002	GET	/mobile1api/v1/mobilebankinfobyroutingnum/{routingNum}	MobileBankInfoByRoutingNumRequestTest	Verified automated
M1-003	GET	/mobile1api/v1/mobilebeneficiaryByExt/{ext}	MobileBeneficiaryByExtRequestTest	Verified automated
M1-004	GET	/mobile1api/v1/mobileowner	MobileOwnerRequestTest	Verified automated
M1-005	GET	/mobile1api/v1/mobileOwnerMenu	MobileOwnerMenuRequestTest	Verified automated
M1-006	GET	/mobile1api/v1/mobileprofilemenu	MobileProfileMenuRequestTest	Verified automated

Pipeline Inventory

ID	Platform	Job	Gate Class	Live Validated
GL-001	GitLab	scheduled_metadataweb_stage1	scheduled regression	No
GL-002	GitLab	prepare	informational	No
GH-001	GitHub Actions	Mobile 2 QC4	deployment validation	Partial
MV-001	Maven	mobile-ms-master-regression	manual trigger only	Partial
MV-002	Maven	mobile-ms-smoke	targeted destructive	Partial
MV-003	Maven	mobile1-auth-regression	manual trigger only	No
JK-001	Jenkins	V2 regression	Unknown	No
JK-002	Jenkins	ASTRO	Unknown	No
JK-003	Jenkins	Performance	Unknown	No

Coverage Calculation Notes

Coverage Calculation Notes

****Assessment date:**** 2026-07-20

****Authority:**** `verified-metrics-register.csv` (rebuilt from live repo evidence)

Mobile 2 — reconciled result

| Question | Answer |

|-----|-----|

| Is it 22/25? | ****No**** — superseded by current code inventory |

| Is it 24/25? | ****Yes for in-scope sign-off**** (24 automated / 24 in-scope) |

| Is it 24/24? | ****Yes**** — recommended leadership metric for MSC API sign-off |

| Is it 25/25? | ****Yes**** if counting `mobilemembers` helper endpoint (smoke only) |

Denominator source

- ****Primary:**** Dinesh sign-off `API Endpoints - Mobile2.xlsx` — ****25 business endpoints****

- ****In-scope denominator:**** ****24**** after excluding `GET /mobile2api/v1/mobilemembers/{planId}/{username}` (acceptance-role helper; 401 expected with member JWT)

Numerator source

- Distinct `(HTTP method + /mobile2api/v1 path)` with ≥ 1 TestNG test in `mobile/mobile2/src/test/java/\*\*`

- ****Count:**** 24 in-scope + 1 excluded helper = 25 automated identities

Formula

...

In-scope automation % = $24 / 24 = 100\%$

Business inventory % = $25 / 25 = 100\%$ (includes smoke-only helper)

Master regression = 41 TestNG test executions (NOT endpoint count)

...

Intentional suite exclusions (still automated)

| Endpoint | Master | Where it runs |

|-----|-----|-----|

PUT/DELETE `/mobilebanks`	No	`mobile2-smoke-testng.xml`
DELETE `/mobilecontribution/{ext}/{id}`	No	contribution module suites, okdirect only
GET `/mobilemembers/{planId}/{username}`	No	smoke only; excluded from denominator

Mobile 1 — reconciled result

| Metric | Value |

|-----|-----|

| Implemented endpoint identities | ****6**** (1 auth POST + 5 business GETs) |

| Approved denominator in repo | ****None committed**** |

| Business APIs branding | ****okdirect only**** |

| IDP coverage | Auth session only (`nmdirect`); not business APIs |

Do ****not**** report a single Mobile 1 percentage without an approved inventory denominator.

Execution vs implementation

- ****Implementation**** = test code exists and maps to endpoint identity
- ****Executed**** = Maven surefire run with pass/fail evidence
- ****Scheduled**** = active CI/cron job in GitLab/GitHub/Jenkins
- ****Sign-off ready**** = implemented + recent pass on target environment + agreed denominator

These layers produce legitimately different percentages.

Historical baseline rule

`mobile/project-documents/00-CURRENT-STATUS.md` (2026-06-15) described 1 Dashboard test — ****superseded**** by current multi-module Mobile 2 suite structure. Do not use for coverage reporting.
