

Government Savings

Automation Coverage & CI Integration Assessment

Assessment Date: July 20, 2026
Rebuild validated: July 21, 2026

Executive Summary

Government Savings automation is organized by business platform and operational activation — what is implemented, what runs on recurring schedules, and what awaits reactivation. A single GS-wide coverage percentage is not defensible. Inventory-share metrics (e.g. V2/V3 TestNG or qTest populations) appear in the technical appendix only, not as functional completeness.

Business Platform Coverage

Busine ss area	Sub-area	Position	Implementat ion	Scheduled	Confiden ce
Unite MSC	Mobile 2 API	Mobile 2 automatio n is complete for the currently defined automatab le business scope; dest...	Complete for automatable scope	Not scheduled — QA- 1405 pending	High
Unite MSC	Mobile 2 API	Near- complete for document ed business scope; harness endpoint excluded from automatio n num...	24/25 implemented	Not scheduled	High
Unite MSC	Mobile 1 API	Partial coverage with expansion in	Partial — sprint expansion	Not scheduled	High

		progress on owner profile beneficiary and bank routing			
Unite MSC	Mobile Enrollment API	Pilot framework in place; endpoint inventory and automation scope not yet enumerated	Bootstrap smoke only	Not scheduled	Medium
Unite MSC	UniteMSC microservices	Service acceptance automation exists; not a substitute for BFF API regression	Substantial service-level assets	Per-repo GitLab pipeline	Medium
Unite MSC	Application source code	Application line coverage separate from business automation; no coverage-delta MR gate	Generated in CI	Service build/test gate	High
Unite MSC	GitHub Actions	Deployment validation — not nightly business regression	Deployment slice validated	Workflow not in clone	Medium
Universal Platform	Universal Enrollment	Majority of current high-priority enrollment journeys automated	Near-complete for approved regression scope	scheduled_regression_job	High

		in Modern Unite nightly			
Univer sal Platfor m	IDP / Authenticat ion	Near- complete automatio n for current document ed IDP regression scope	Near- complete for approved regression scope	scheduled_regression_job	High
Univer sal Platfor m	Withdrawal s	Withdrawal domain automated in nightly; transfers adjacent (12 V2 methods)	Near- complete for withdrawal regression scope	scheduled_regression_job	High
Univer sal Platfor m	Entity / ABLE Entity	Partial coverage with expansion in progress; remaining work primarily Entity and newly mig...	Partial — 6 scenarios in repo	Unknown pipeline inclusion	High
Univer sal Platfor m	Angular lib- ui	Component tests — not E2E business journey coverage	Component- level only	accountowner_build_tdd partial	Medium
Univer sal Platfor m	Universal API (scoped)	API automatio n exists beyond metadata; only metadata web on GitLab schedule today	11 ops mapped in UP ledger	scheduled_metadataweb_ stage1	High
Univer sal Platfor	Performanc e journeys	Performan ce assets exist; not	IDP perf scheduled; others	Partial scheduled	Medium

m		all journeys on recurring schedule	manual

Verified Metrics Register

Area	Metric	Result	As of	Evidence
Unite MSC	Mobile 2 business endpoint automation (code)	96.0%	2026-07-20T18:15:00-04:00	C:\Workspace\GitLab\api-test-automation/mobile/mobile2
Unite MSC	Mobile 1 endpoint automation (code)	22.2%	2026-07-20T18:15:00-04:00	mobile/mobile1
Unite MSC	Mobile 1 execution-verified endpoints	3.7%	2026-07-09	03-document-postman-coverage-matrix.md
Universal Platform	V3 scoped TestNG nightly share	86.9%	2026-07-01	universal-platform-coverage
Universal Platform	V3 GitLab scheduled job	100%	2026-07-20T18:15:00-04:00	prime-test-automation/.gitlab-ci.yml
Universal Platform	Metadataweb API GitLab job	100%	2026-07-20T18:15:00-04:00	api-test-automation/.gitlab-ci.yml

Pending Verification (do not quote as final)

Area	Metric	Projected	As of	Dependency
------	--------	-----------	-------	------------

CI/CD Integration

GitLab: V3 scheduled_regression_job and metadataweb Stage1 — scheduled jobs exit non-zero on failure (not verified as MR merge gates). GitHub Actions: Mobile 2 Dashboard vertical slice externally validated; workflow repository not in audit clone. Jenkins: IDP performance scheduled; V2 UI recurring job not verified. Mobile 2 GitLab nightly not created (QA-1405).

Leadership Narrative

The team has meaningful automation across Government Savings. The current limitation is not the ability to build automation; it is establishing a consistent, traceable coverage model across Jira, qTest, repositories, and CI execution.
