Welcome to the Performance & Automation Engineering Team!

This onboarding guide is designed to help new team members hit the ground running. Bookmark this page and refer to it often during your first few weeks.

1. Welcome Message & Vision

Welcome to the Performance Testing team at Ascensus!

Our mission is to ensure world-class performance, reliability, and automation through scalable and intelligent test engineering practices.

Team Values

- Ownership & Accountability
- Clear Communication
- Quality-Driven Testing
- Continuous Improvement
- Innovation & Collaboration

2. First Week Overview

Day	Focus Area	Expected Outcome
Day 1	Access & Accounts Setup	Email, VPN, Git, Jira, Confluence
Day 2	Tool Installation	JMeter, Taurus, IntelliJ, Postman
Day 3	Framework & Env Setup	Local automation/perf setup complete
Day 4	Review Sample Projects	Understand test flows and folder structure
Day 5	Join Standups + Shadow Team	Attend scrum, sync with buddy, start first story

3. Required Access & Tools Checklist

- Email & Office 365
- Confluence (<https://confluence.ascensus.com>)
- Jira (<https://jira.ascensus.com>)
- GitHub / GitLab
- Rancher & Kubernetes
- New Relic
- VPN Access

- JMeter – [Install Guide](#)
- Taurus – [Setup Docs](#)
- [IntelliJ IDEA](#) or [VS Code](#)
- [Postman](#)
- Docker (Optional)
- kubectl – [Install Guide](#)

4. Local Setup Instructions

1. Clone repo from GitLab: ``/performance-test-automation``
2. Open IntelliJ Import Maven/Gradle project
3. Validate folder structure and ``testng.xml``
4. Run smoke test locally
 1. Install Taurus CLI
 2. Clone ``/performance/universal`` repo
 3. Edit YAML for test plan (threads, hold-for)
 4. Execute: ``bzt plan.yaml``
 5. View results in console or BlazeMeter
1. Download ``KubeConfig`` from Rancher
2. Place config at ``C:\Users\<user>\.kube\config``
3. Login to Jenkins: [Jenkins URL](#)
4. Trigger prebuilt jobs or configure a new one from YAML/JMX

5. Learning Resources

- KT Deck: [Performance Testing Basics](#)
- KT Video Library (SharePoint)
- Test Result Review Training (Henry/Swapnil)
- LinkedIn Learning: "JMeter Advanced"
- YouTube: Taurus + YAML beginner guide
- BlazeMeter Academy: End-to-End Workshop

6. Team & Contacts

Name	Role	Contact
Swapnil Patil	Performance Lead	@swapnil.patil
Henry Dittmer	QA Manager	@henry.dittmer
Marsel / Nick / Prasanthi	Platform SMEs	Slack: #qa-performance

Slack Channels:

- #qa-performance – Team Chat **(TBD)**
- #qa-alerts – Daily Reports **(TBD)**
- #qa-support – Ask Questions Here **(TBD)**

7. First 14 Days - Task Checklist

Task List		
	☐ Request all tool access	
	☐ Install and configure Taurus, JMeter	
	☐ Clone and run first test repo	
	☐ Attend KT & team standups	
	☐ Join performance review call (weekly)	

▼	☐	Shadow team member on a real test	🔗
▼	☐	Deploy YAML job in Jenkins	🔗
▼	☐	Read “Perf Strategy & Lifecycle” Confluence page	🔗

8. FAQ (Newbie Edition)

Typically 3s Avg, 5s 90th percentile. Check with your team lead for app-specific thresholds.

Make sure your `KubeConfig` file is valid and in `C:\Users\<yourname>\.kube\config`. Ping DevOps if needed.

Login, Dashboard load, Enrollment API, CSR heavy flows. Refer to BlazeMeter archives or `performance/universal` repo.

9. Feedback & Continuous Improvement

Found something unclear? Want something added to this doc?

Add a comment or ping @swapnil.patil on Slack — we’re constantly improving onboarding!
