

IDP - Metrics & KPI

KPI	Description	Target	Unit	Calculation Source	Calculation
Average Authentication Time	Time from login submission (POST login) to successful token issuance includes MFA (POST token)	500	ms	Jmeter /Blazemeter	Based on idp-login-resources.jmx: (Average response times of steps: 4-1 through 7 [inclusive])
Average Authentication Time - 95%	Time from login submission (POST login) to successful token issuance includes MFA (POST token)	1000	ms	Jmeter /Blazemeter	Based on idp-login-resources.jmx: (95% response times of steps: 4-1 through 7 [inclusive])
Token Exchange Time (OAuth / OIDC) - average	POST token	200	ms	Jmeter /Blazemeter	Based on idp-login-resources.jmx: Average response times of step 7
Token Exchange Time (OAuth / OIDC) - 95%	POST token	200	ms	Jmeter /Blazemeter	Based on idp-login-resources.jmx: 95% response times of step 7
Service Uptime / Availability	% of time IdP is available for authentication	99.90%	%		N/A
Auth Success Rate	Successful logins / total attempts (# of attempts / # of successful at overview)	99.50%	%	Jmeter /Blazemeter	Based on idp-login-resources.jmx: A) Successful logins = (Samples of step 8) * (1 - Error % of step 8) B) Number of attempts = (Samples of step 1) Calculation: A / B
Error Rate (System)	Error rate across all steps in flow	0.10%	%	Jmeter /Blazemeter	Based on idp-login-resources.jmx: Error % of ALL/TOTAL
Mean Time to Recovery (MTTR)	Time to recover from a service outage	30	min		N/A
Requests per Second (RPS)	Sustained auth transactions handled (New Relic)	10000	req/s	New Relic	1. Set new relic time for test execution 2. Navigate to service: AGSUP-auth-server-stage1 3. On Summary tab, find Throughput graph and get rpm average Calculation: rpm / 60
Peak Load Tolerance	PKCE token successfully creation rate	30	log in /s	Jmeter /Blazemeter	Based on idp-login-resources.jmx: A) Successful logins = (Samples of step 8) * (1 - Error % of step 8) B) Duration of test (in seconds) Calculation: A / B
Auto-scaling Response Time	Time to allocate new capacity under surge	5	min		N/A
End-to-End Login Time (with redirects & MFA) - 95%	From "Sign In" click to app landing (overview)	2000	ms	Jmeter /Blazemeter	Based on idp-login-resources.jmx: (95% response times of steps: 1 through 8 [inclusive])
MFA Prompt Response Time	From MFA request to completion				N/A
SSO Token Reuse Rate	Percentage of logins completed without password re-entry (Micro Front End)	85%			N/A
