

Credentials & Secret Encryption

Encryption

- JMeter script location for encryption: performance-test-automation\performance\credentials\jmeter
- Use the appropriate step to encrypt either a specific string or CSV file

Encrypt CSV Credentials

- Encrypt a file called credentials.csv (in same directory as JMX)
- Expects following fields: plan-prefix, username, password, account
- Creates a file called encrypted.csv (in same directory as JMX)

Encrypt Value

- Encrypt a value in the step: User Defined Variables
- Will output encrypted value to *Log Viewer Panel*
