

01. QA Automation - Charter & Squad Purpose

 **Page is about?**
Defines who we are, what we do, and how we measure success as a high-performing QA Automation Squad.

Squad Charter: Why We Exist

We are the **SDET & Automation Engineering Squad** at Ascensus.
Our mission is to **drive scalable, maintainable, and intelligent test automation** across all environments, pipelines, and platforms.

We empower teams to release with confidence through:

- Fast, reliable, and reusable test frameworks
- Full lifecycle validation: API, UI, Backend, Performance
- Continuous Integration & Deployment (CI/CD) compatibility
- Traceability, reporting, and visibility across squads

Our Core Objectives

Focus Area	What We Aim For
Test Automation	Shift-left, scalable, modular automation for all test types
DevOps Alignment	Seamless CI/CD integrations via Jenkins, GitLab
Skill Growth	Mentorship, KT, and internal tool documentation
Reporting & KPIs	Transparent visibility on test coverage & quality metrics
Code Quality	Peer reviews, Git hygiene, and static/dynamic analysis tools

Tech Stack & Tools

Category	Tools & Platforms
Automation	Java, Selenium, TestNG, Cucumber, Rest Assured (API)
Build & CI/CD	GitLab, Jenkins
Performance	Taurus (bzt), JMeter, BlazeMeter, New Relic
Test Management	qTest, JIRA, Confluence
Editors & IDEs	IntelliJ IDEA, VS Code, Eclipse
K8s & Infra Access	Rancher, kubectl, Helm

Squad Roles & Structure

Role	Description
Senior SDET	Leads automation initiatives, mentors others
Senior QA Automation	Develops and executes automated tests
Performance QA	Designs load, stress, soak, spike test flows
QA Lead	Coordinates testing strategy across squads
DevOps Liaison	Supports test pipeline deployment & config

How We Measure Success

KPI / Metric	Target
--------------	--------

Test Automation Coverage	<i>TBD e.g. 85% (API / Critical UI)</i>
Time to First Test Failure	<i>TBD e.g. < 3 minutes in CI pipeline</i>
Defect Leakage (Prod)	<i>TBD e.g. 2 per release</i>
Test Execution Time (Suite)	<i>TBD e.g. 20 minutes per run</i>
Automation Bug Bounce Back	<i>TBD e.g. 10%</i>

Collaboration Expectations

- Daily Standups, Sprint Planning, and Retros with Dev, QA, Product
- Regular KT sessions and doc updates in Confluence
- Squad-wide ownership of reliability, not just coverage
