

02. Environment Access & Setup

Page is about?

Purpose: This page serves as a one-stop reference to help SDETs request, configure, and validate all critical environment-level accesses for seamless onboarding and daily execution, including databases, Control-M, remote tools, and secure shell access.

Access Required for All SDETs

Access Type	Purpose	Request Process / Contact	Notes
Admin	Local Admin access to your laptop	Go to Freshservice , select Request a Service , select Security , select Local Admin Request . Add requested information.	
CSR	Client Services Application - Identify the CSR links on the UI Build Environments page	use RSD username and password to login otherwise contact your team lead to create access OR Send email to csapppermission@ascensus.com , and copy your manager. Identify a person whose access you want to mirror. The email text should be something like: <i>Hi,</i> <i>Please provide entitlement access for CSR PROD & Stage 1-2. Links:</i> ◦ Stage1 <Provide the CSR link> ◦ Stage2 <Provide the CSR link> ◦ PROD <Provide the CSR link> <i>Please mirror the access of <Who do you want to mirror?>.</i> <i>Thanks</i>	
DB Access: Stage1 DB (UIIS01) S t a g e 2 D B (U I I S 0 2) S t a g e 4 D B (U I I S 0 4)	DB validations, test data loads	Request via RT Send an email to UII Access with your name and email, requesting access to the tunnel and schemas that you need. - Note: CC your manger to give approval Contact: smithaziah.christabel@ascensus.com	Requires Putty + SQL Developer setup Mirror user: Swapnil Patil or Nick Botvinnik
Control M	Job monitoring and backend coordination	Request via RT Send an email to UII Access Open remote desktop to CTMTERMWT1 or CTMTERMWT2	Use AD credentials Mirror user: Swapnil Patil or Nick Botvinnik
JAWS	UNIX environment for app backend ops	Request via RT Raise ticket via IT Helpdesk or GS Confluence	Setup after DB access
L Drive Access	Automatic access Scripts, config files, KT sessions	Request via RT Email itsupport@ascensus.com	Access L:\Departments\Financial Services\UII\UII\

Gitlab	Version control for automation scripts	Request via RT Contact: MarseL.Hako@ascensus.com	Use Eclipse/IntelliJ plugin setup
Email Whitelisting	Receive app alerts from QC /Stage	Request via RT Subject: [AGS #472436] Whitelist	Email: acs-rt@rt.acs529.com
VPN (AGS Eastern)	Required for frogger & putty forwarding	Request via RT Standard AGS VPN Access	Ensure not using "Eastern" VPN
IntelliJ/Eclipse	IDE for Automation development	Request via RT Request to approve & install one of the recommended IDE for offshore team	
Confluence	Automatic access	Request via RT incase unable to access then create RT to request Access	
JIRA / Tempo	Access to Jira board	Send an email to AGS-Jira Team (should be done by initial onboarding ticket)	
RT	Ticketing system	Send an email to UII Access with your name and email, requesting access to RT. Include which user to mirror the access rights. Note: CC your manger to give approval	Should be requested during onboarding access ticket Pro Tip: Keep checking on the tickets with the Access team, because sometimes it can take a few days for the ticket to work its way through the system.
Splunk	This will be used to view application logs and alerts for PROD/Pre-PROD	Send an email to UII Access Include which user to mirror the access rights. Note: CC your manger to give approval	
New Relic	This is our Application Monitoring Tool for PROD	Send an email to UII Access Include which user to mirror the access rights. Note: CC your manger to give approval	
Outlook/ Teams		Send an invite to join the Teams Channels.	
Unix	This is needed to get access to QC and Stage servers (should be done with initial onboarding ticket)	Send an email to UII Access Include which user to mirror the access rights. Note: CC your manger to give approval	

Sample Access Request Template (RT Ticket)

Subject: Access Request - [Stage1 DB / Control M / L Drive]

Hi Team,

Please grant me access to the following environment:

- Type: Stage 1 Database
- Purpose: QA Automation Testing / Data Validation
- Hostname: localhost, Port: 41521
- SID: UIIS01
- Username: [your AD ID]
- Mirror User: Swapnil Patil or Nick Botvinnik

Additionally, please provide permissions to L:\ drive and Control M if not already provisioned.

Regards,
[Your Full Name]
[Project Name - QA Automation]
