

02. Skills Matrix & Technical Evaluation Criteria – Sr. SDET / Sr. Automation Engineer

Page is about?

This page is designed to help **interviewers, hiring managers, and panel members** objectively assess candidates applying for the Sr. SDET or Sr. Automation Engineer role.

Purpose

- Define the key technical skills expected at this level.
- Apply a **consistent 1–5 rating scale** across all interviews.
- Align role expectations with candidate proficiency.
- Enable apples-to-apples comparison across candidates.

Rating Scale (1–5)

Rating	Level	Meaning
1	No Experience	No practical exposure or knowledge
2	Beginner	Some understanding, needs guidance
3	Intermediate	Can work independently on most tasks
4	Advanced	Deep understanding, can optimize, review others' work
5	Expert	Go-to expert, drives best practices, mentors others

Skills Grid (Core Evaluation Areas)

Skill Area	Required For	Sr. SDET Expectation	Sr. Automation Eng Expectation	Candidate Rating (1–5)	Notes
Java Programming	Both	4–5	3–4		
OOPs Concepts	Both	4–5	3–4		
Selenium WebDriver	Both	4–5	4–5		
TestNG / JUnit	Both	4	4		
Cucumber (BDD)	Both	4	3–4		
API Testing – Postman (Manual)	Both	4	3–4		
API Testing – RestAssured (Automation)	SDET Only	4–5	2–3
