

2. Legacy Web Registration – Automation Regression Suite (Prime Version 2)

What's Included

Purpose

This module validates legacy (non-IDP) web registration flows for individual account owners. It covers re-registration (existing account removed, then re-reg and login), first-time account registration, and negative scenarios across multiple plans so users can create accounts and access the portal.

Legacy Web Registration suite at a glance

Question	Answer
Module	Legacy Web Registration
What we run	Legacy (non-IDP) web registration: re-registration (existing account, remove then re-reg and login), first-time account registration, and negative (non-web registered) flows.
When	Daily, Mon–Fri, as part of Stage 1 nightly regression.
Time	Suite starts ~12:00 AM – 1:00 AM EST; module duration ~55 minutes.
Framework	Prime V2 (Java + Selenium + TestNG + Cucumber, Ant build)
What plans	CAD, MND, MID, OKD, COB, RID, COD.
What cases	11 test blocks (54 scenarios/methods in latest report). See Module & plan coverage and Test scenarios below.
Suite definition	bin/regression/daily/stage1-web-registration.xml.
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
Reports	TestNG HTML Reports
qTest Dashboard	Legacy Web Reg Dashboard – Stage 1

Latest Report Summary (from TestNG HTML)

Metric	Value
Suite	1 suite, Regression Test Suite - Legacy Web Registration
Tests	11 tests
Methods	54 methods
Passed	52 passed
Failed	2 failed
Skipped	0
XML	stage1-web-registration.xml

Coverage Summary

Attribute	Detail
Tests (XML)	11 test blocks
Methods (from report)	54
Approx Duration	~55 minutes

Thread Count	1
Runner	FeatureRunner
Tags	@regression and @dailyrun
Plans Covered	CAD, MND, MID, OKD, COB, RID, COD

Module & plan coverage

Same format as Confluence PDF. Scenario counts and qTest mapping can be updated from the latest HTML report and qTest.

Plan	Flow type	Feature file	Scenario count	qTest mapping	Tags
CAD	Re-registration – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
MND	Re-registration – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
MID	Re-registration – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
OKD	Re-registration – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
COB	Re-registration (ABLE) – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
COD	Re-registration – Existing account, re-reg and login	Web_Reregistration_Existing_Account.feature	—	—	@regression, @dailyrun
RID	Web Registration – Negative (non-web registered account)	T101_WebRegistrationNegative.feature	—	—	@regression, @dailyrun
COD	First-time account – Non-web registered account	Web_Registration_First_Time_Account.feature	—	—	@regression, @dailyrun
COB	First-time account (ABLE) – Non-web registered account	Web_Registration_First_Time_Account.feature	—	—	@regression, @dailyrun
MND	First-time account – Non-web registered account	Web_Registration_First_Time_Account.feature	—	—	@regression, @dailyrun
RID	First-time account – Non-web registered account	Web_Registration_First_Time_Account.feature	—	—	@regression, @dailyrun

Scenario count: Total 54 methods in latest HTML report; per-feature counts can be taken from the report or qTest.

Test Scenarios (from suite XML)

Full list of test blocks and feature paths as defined in `bin/regression/daily/stage1-web-registration.xml`.

#	Test name	Traunch	Feature path
1	CAD - Legacy Web Registration and login - Existing, remove registered Accounts, re-reg and login	cad	frontoffice/common/webregistration/feature /Web_Reregistration_Existing_Account.feature
2	MND - Legacy Web Registration and login - Existing, remove registered Accounts, re-reg and login	mnd	frontoffice/common/webregistration/feature /Web_Reregistration_Existing_Account.feature
3	MID - Legacy Web Registration and login - Existing, remove registered Accounts, re-reg and login	mid	frontoffice/common/webregistration/feature /Web_Reregistration_Existing_Account.feature
4	OKD - Legacy Web Registration and login - Existing, remove registered Accounts, re-reg and login	okd	frontoffice/common/webregistration/feature /Web_Reregistration_Existing_Account.feature
5	COB - Legacy Web Registration and login for ABLE - Existing, remove registered Accounts, re-reg and login	cob	frontoffice/common/webregistration/feature /Web_Reregistration_Existing_Account.feature
6	RID - Legacy Web Registration Negative-- Non Web Registered Account	rid	frontoffice/common/webregistration/feature /T101_WebRegistrationNegative.feature
7	COD - Legacy Web Registration and login - Non Web Registered Account	cod	frontoffice/common/webregistration/feature /Web_Registration_First_Time_Account.feature
8	COB - Legacy Web Registration and login for ABLE - Non Web Registered Account	cob	frontoffice/common/webregistration/feature /Web_Registration_First_Time_Account.feature
9	MND - Legacy Web Registration and login - Non Web Registered Account	mnd	frontoffice/common/webregistration/feature /Web_Registration_First_Time_Account.feature

10	RID - Legacy Web Registration and login - Non Web Registered Account	rid	frontoffice/common/webregistration/feature/Web_Registration_First_Time_Account.feature
11	Legacy Web Registration and login - Existing, remove registered Accounts, re-reg and login	cod	frontoffice/common/webregistration/feature/Web_Reregistration_Existing_Account.feature

What's covered

- **Re-registration (existing account):** Remove existing web registration, then complete legacy web registration and login (CAD, MND, MID, OKD, COB, COD). Individual account owner flows.
- **First-time account:** Legacy web registration and login for non-web registered accounts (COD, COB, MND, RID).
- **Negative:** Legacy web registration negative – non-web registered account (RID) via T101_WebRegistrationNegative.feature.
- **ABLE:** COB-specific flows for ABLE (re-reg and first-time).

Notes

- **11 test blocks** in suite XML; **54 methods** (scenarios) in latest HTML report.
- **Module & plan coverage:** Fill *Scenario count* and *qTest mapping* from the latest TestNG report and qTest/Confluence when updating this page.
- All tests use **FeatureRunner** (single-threaded). Suite parallel="tests" with thread-count="1" so tests run sequentially.
