

7. Balance Page – Automation Regression Suite (Prime Version 2)

Purpose:

This module validates the Account Balance page across CSR and member portal interfaces. It covers IDP and non-IDP direct plans, ABLE plans, and advisor plans, ensuring balance display and validation logic work correctly for each plan type and access channel.

What's covered

- **CSR balance validation (BalancePageValidation.feature):** IDP direct (NJ, NM), non-IDP direct (NY, RI), IDP Able (AK, MI), non-IDP Able (RI), advisor (NY, RI). One test per plan; validates balance display via CSR.
- **Member balance (MemberBalancePageValidation.feature):** MND direct legacy — legacy web-registered member login and balance validation via member portal.

Notes

- **10 test blocks** in suite XML; **10 methods** (scenarios) in latest HTML report — one scenario per test.
- **Naming convention (XML):** "Account Balance Validation via CSR - <State> <PlanType> (<IDP|Non-IDP>)". Advisor plans omit IDP qualifier. Do not modify feature or parameter values without product approval.

- **MND test:** Uses **FeatureRunner** and **MemberBalancePageValidation.feature** (member portal / legacy); all other tests use **ParallelFeatureRunner** and **BalancePageValidation.feature** (CSR).
- **Module & plan coverage:** Fill *Scenario count* and *qTest mapping* from the latest TestNG report and qTest/Confluence when updating this page.
