

2. Legacy Web Registration – Automation Regression Suite (Prime Version 2)

What's Included

Purpose

This module validates the **Legacy Web Registration** workflows within **Prime Version 2 Unite regression pipeline**, ensuring complete coverage for:

- Existing web-registered users (Re-registration, Removal, and Login)
- New/non-registered users (First-time registration and activation)
- CSR-to-Member handoff, contact/security details, and account activation flow

Suite Information

Attribute	Details
Owner	QA Automation Team
Environment	Stage 1
Suite Name	Regression Test Suite – Legacy Web Registration
Suite File	/qa-automation/unite/bin/regression/daily/stage1-web-registration.xml
Framework Version	Prime Version 2
Test Type	Cucumber-based E2E Functional Regression
Execution Time	Daily @ 12:00 AM EST
Framework Tools	TestNG + Cucumber + Selenium
Tags	@regression, @dailyrun
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
Reports	TestNG HTML Reports
qTest Dashboard	Legacy Web Reg Dashboard – Stage 1

Execution Summary

Metric	Count / Status
Total Tests	3
Methods Executed	8
Execution Duration	~10 minutes
Execution Status	Completed
Runner Type	Sequential (FeatureRunner)
Plans Covered	KSD, COD

Module & Plan Coverage

Plan (s)	Feature File	Functional Area	Scenario Count	Tags
KSD	Web_Reregistration_Existing_Account.feature	Legacy Web Registration – Existing Registered Account	3	@regression, @dailyrun

KSD	Web_Registration_First_Time_Account.feature	Legacy Web Registration – First-Time / Non-Registered Account	2	@regression, @daily run
COD	Web_Reregistration_Existing_Account.feature	Re-Registration / Removal / Login Validation	3	@regression, @daily run

Scenario Breakdown

#	Scenario Name	Feature File
1	Legacy Web Reg – Get Account details from CSR and save into temp file	Web_Reregistration_Existing_Account.feature
2	Legacy Web Reg – Perform member Web Registration for Individual Account Owner	Web_Reregistration_Existing_Account.feature
3	Remove Auto Web Registration from Account with Individual Account Owner	Web_Reregistration_Existing_Account.feature
4	Get Account SSN details from Account Overview and save into CSV	Web_Registration_First_Time_Account.feature
5	Web Registration with Individual Account Owner (First-Time Flow)	Web_Registration_First_Time_Account.feature
6	Legacy Web Reg – Perform Web Registration (COD Plan)	Web_Reregistration_Existing_Account.feature
7	Remove Auto Web Registration (COD Plan)	Web_Reregistration_Existing_Account.feature
8	User Login using Web Registered Accounts (Legacy Login Validation)	Web_Reregistration_Existing_Account.feature

Automation Highlights

- Complete **E2E coverage** for both existing and first-time web registrations.
- Automated data flow between **CSR portal** **Member web registration**.
- Includes **temporary CSV data persistence** between flows.
- Automated validation of:
 - Security question setup
 - Account owner identification
 - Login confirmation and re-registration logic
- Fully **Cucumber-based**, reusable step definitions under common.webregistration module.
- Test data parameterized via **plan (KSD, COD)** tags.

Observations / Improvement Areas

Area	Observation / Status
CSR Member handoff	Occasional timeout during CSR account fetch.
Web re-registration flow	Fails intermittently due to session timeout.
Report Mapping	qTest mapping exists for all scenarios but requires re-validation weekly.
Negative Cases	Not yet automated (e.g., duplicate emails, invalid DOB formats).

Recommendations & Next Steps

1. **Enhance scenario coverage** with:
 - Validation and error-handling tests.
 - Edge cases like missing DOB, duplicate SSN/email.
2. **Consolidate IDP Login mapping** with the **Universal Enrollment** suite.
3. **Add logging and screenshots** for failed or timed-out registration steps.
4. **Optimize re-registration flow** with explicit waits and retry logic.
5. **Extend plan coverage** to include TU and conversion accounts.

Maintenance Guidelines

Frequency	Owner	Action
Daily	QA Automation Team	Monitor Jenkins job and validate HTML reports.
Weekly	Lead SDET	Review failed tests, analyze logs, update mappings.

Monthly	QA Lead	Ensure new enrollment edge cases are incorporated.
Quarterly	QA Architect	Expand cross-plan coverage and merge with IDP flow suite.
