

3. Legacy Web Login – Automation Regression Suite (Prime Version 2)

What's Included

Purpose:

The **Legacy Web Login** suite validates the **complete member login and recovery workflows** for non-IDP-based environments within the **Prime Version 2 regression pipeline**.

It ensures coverage for:

- Standard member login (Direct/Non-IDP)
- **Forgot Username** recovery flow
- **Forgot Password** recovery flow
- Login using existing registered web credentials
- CSR-initiated password updates and resets

Suite Information

Property	Value
Owner	QA Automation Team
Environment	Stage 1
Suite Name	Regression Test Suite – Legacy Web Login
Suite File Path	/qa-automation/unite/bin/regression/daily/stage1-web-login.xml
Framework	TestNG + Cucumber + Selenium
Execution Frequency	Daily @ 1:00 AM EST
Tags Used	@regression, @dailyrun
Runner Class	com.cs529.qa.prim.runner.FeatureRunner
Framework Version	Prime Version 2
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
Reports	TestNG HTML Reports
qTest Dashboards	qTest Execution Dashboard

Execution Summary

Metric	Count / Status
Total Tests	10
Methods Executed	14
Feature Files	6
Execution Duration	~15 minutes
Runner Type	Sequential (FeatureRunner)
Plans Covered	MID, OKD, KSD

Module & Plan Coverage

Plan	Test Class / Feature File	Functional Area	Scenario Count	Tags
MID	T101_LoginPositive.feature	Standard Login (Positive Flow)	2	@regression, @dailyrun

MID	T101_LoginNegative.feature	Login Validation – Invalid Credentials	1	@regression, @dailyrun
OKD	T101_LoginPositive.feature	Standard Login (Positive Flow)	2	@regression, @dailyrun
MID	T101_ForgotUsernamePositive.feature	Forgot Username (Until Email Sent)	1	@regression, @dailyrun
MID	T101_ForgotUsernameNegative.feature	Forgot Username (Invalid Inputs)	1	@regression, @dailyrun
OKD	T101_ForgotUsernamePositive.feature	Forgot Username (Until Email Sent)	1	@regression, @dailyrun
OKD	T101_ForgotUsernameNegative.feature	Forgot Username (Negative Flow)	1	@regression, @dailyrun
MID	T101_ForgotPasswordPositive.feature	Forgot Password Recovery	2	@regression, @dailyrun
KSD	T101_ForgotPasswordPositive.feature	Forgot Password – Cross Plan Validation	2	@regression, @dailyrun
KSD	Legacy_Login_Registered_Account.feature	Legacy Web Registered Account Login	1	@regression, @dailyrun

Scenario Breakdown (Chronological Order)

#	Scenario Name	Feature File
1	Perform CSR Password Update positive test User Login	T101_LoginPositive.feature
2	User Login for User Login	T101_LoginPositive.feature
3	Validate Login for Login Page	T101_LoginNegative.feature
4	User Forgot Username (Positive)	T101_ForgotUsernamePositive.feature
5	User Forgot Username (Negative)	T101_ForgotUsernameNegative.feature
6	Perform CSR Password Update positive test Forgot Password	T101_ForgotPasswordPositive.feature
7	User Login for Forgot Password	T101_ForgotPasswordPositive.feature
8	User Login using Web Registered Accounts for Legacy Login (Existing Web Accounts)	Legacy_Login_Registered_Account.feature

Automation Highlights

- Validates **Direct/Non-IDP login** and recovery across MID, OKD, and KSD plans.
- Covers both **CSR-initiated** and **member-initiated** login/recovery flows.
- Includes **Forgot Username** and **Forgot Password** positive/negative test cases.
- Automatically syncs with **qTest dashboards** for traceability.
- Supports **MFA toggle handling** in precondition setup for non-blocking automation.
- Integrated with **HTML reports and screenshots** for trace validation.

Observations / Issues

Area	Observation / Status
Forgot Password (KSD)	Element not clickable due to modal overlay (ui-widget-over lay) — intermittent.
MFA Selection Screen	Fails occasionally when 2FA radio button not visible (seltwoFactorPinDeliverpref).
CSR Update Step	Wait condition failure; expected element not found within 30 seconds.
Performance	Execution stable, minimal flakiness, but can benefit from improved waits.

Recommendations & Next Steps

- Enhance locator stability** for Forgot Password flows (use ExpectedConditions.elementToBeClickable).
- Introduce retry logic** for overlay-based failures (using Selenium wait strategy).
- Add edge case coverage:**
 - Expired credentials
 - Incorrect MFA or PIN attempts
 - Concurrent login handling
- Integrate with IDP V3 Login Suite** (planned migration target).
- Implement reusable login hook** to consolidate duplicate login steps.

Maintenance Guidelines

Frequency	Owner	Action
Daily	QA Automation Team	Monitor Jenkins execution; review failures.
Weekly	SDET Lead	Validate MFA toggle handling; verify qTest sync.
Monthly	QA Manager	Review logs for persistent login errors.
Quarterly	QA Architect	Plan merge with Universal Login (IDP) Suite.
