

7. Balance Page – Automation Regression Suite (Prime Version 2)

Purpose:

This suite verifies **Account Balance Page functionality** within the **Prime Version 2 regression pipeline**, ensuring accurate reflection of member account balances across all plan types in **CSR (Customer Service Representative)** views.

Environment: Stage1
Suite Path: /qa-automation/unite/bin/regression/daily/stage1-acct-overview.xml
Updated: 19 Nov 2025
Owner: QA Automation Engineering – Prime V2

1. Execution Summary

Item	Details
Execution Status	Completed
Overall Pass Rate	100% (excluding known flakiness)
Known Flaky Case	ORA-00942: table or view does not exist – random DB fetch failure; backlog story created
Total Plans Executed	10
CSR Portal Coverage	Completed
Member Portal Coverage	Legacy (KSD)
ABLE Plans Coverage	3/3 Completed
Runner	TestNG + Cucumber
Tags Used	@regression, @dailyrun
Pipeline	STAGE1-Daily-Unite-Prime-Regression (Jenkins)
Next Actions	Add retry wrapper for ORA-00942, expand V3 Member Portal balance validation

2. Validation Steps (Standardized Across All Plans)

These are the exact functional steps executed for every test case in the Balance Page suite:

1. Launch CSR or Member portal
2. Authenticate using default CSR credentials or Member MFA login
3. Pull account information from DB (account number, balance)
4. Navigate CSR Member dashboard (jump-to-member)
5. Read displayed balance from UI
6. Validate formatting + currency accuracy
7. Cross-verify against DB snapshot
8. Capture screenshot + DB values for reporting
9. Return to CSR dashboard / end session

These steps are followed consistently across **Direct**, **Advisor**, **ABLE**, and **Legacy** flows.

3. Plan Coverage & Execution Table (Unified View)

All plans covered, including IDP, Non-IDP, Advisor, ABLE, and Legacy.

Plan	Plan Type	IDP / Non-IDP	ABLE?	Portal	Feature File	Status	Notes
NJD	Direct	IDP	No	CSR	BalancePageValidation.feature	Passed	Stable
NMD	Direct	IDP	No	CSR	BalancePageValidation.feature	Passed	Init. slow response fixed
NYD	Direct	Non-IDP	No	CSR	BalancePageValidation.feature	Passed	Stable
RID	Direct	Non-IDP	No	CSR	BalancePageValidation.feature	Passed	Stable
NYA	Advisor	Non-IDP	No	CSR	BalancePageValidation.feature	Passed	Stable
RIA	Advisor	Non-IDP	No	CSR	BalancePageValidation.feature	Passed	Stable

AKB	ABLE	IDP	Yes	CSR	BalancePageValidation.feature	Passed	ABLE covered
MIB	ABLE	IDP	Yes	CSR	BalancePageValidation.feature	Passed	ABLE covered
RIB	ABLE	Non-IDP	Yes	CSR	BalancePageValidation.feature	Passed	ABLE covered
KSD	Legacy	Non-IDP	No	Member	MemberBalancePageValidation.feature	Passed	MFA + legacy login

4. ABLE Plan Coverage (Dedicated Section)

ABLE-related Balance Page coverage is now fully automated and integrated into nightly regression.

ABLE Plans Covered

Plan	State	IDP?	Portal
AKB	Alaska ABLE	Yes	CSR
MIB	Michigan ABLE	Yes	CSR
RIB	Rhode Island ABLE	No	CSR

ABLE Functional Coverage

CSR login
 DB lookup for ABLE account
 Jump-to-member ABLE dashboard
 Read ABLE balance
 Validate DB UI accuracy
 Check multi-subaccount balance
 ABLE-specific formatting rules

ABLE Execution Stability

- All tests passed
- 0 failures
- 100% stability
- No MFA or DB delays observed

5. Known Issues / Flaky Failures

Issue	Root Cause	Status	Notes
ORA-00942: table or view does not exist	Stage1 DB intermittently missing view during read, unable to reproduce this locally	Flaky	Added to backlog
Post-refresh DB lag (Direct plans)	CSR Member mapping delay	Resolved	Timeout extended internally

6. Improvements & Next Steps

Short-Term

- Add retry wrapper for ORA-00942 DB calls
- Add enhanced wait conditions for CSR Member mapping
