

Automation Regression Sign-Off Document (Per Module)

Automation Regression Sign-Off Document

Module: <Module Name>
Framework Version: Prime V2 / V3
Date: <MM/DD/YYYY>
Prepared By: <Your Name>
Reviewed By: <Reviewer(s)>
Approved By: <Approver(s)>

1. Module Overview

Item	Details
Module Name	e.g., Make a Withdrawal
Primary Objective	Brief description — what functionality or business process this module validates
Framework Version	Prime V2 / V3 / Combined
Test Type	Functional / Regression / E2E
Execution Frequency	Daily @ 1:00 AM EST (via Jenkins)
Primary Environment	Stage1 / Stage2
Regression Suite Path	/qa-automation/unite/bin/regression/daily/<suite-name>.xml
Jenkins Job Name	e.g., STAGE1-Daily-Unite-Prime-Regression
Reporting Source	TestNG HTML, Jenkins logs, qTest dashboard

2. Scope and Coverage

Category	Details
Functional Areas Covered	(List major flows e.g., Qualified/Non-Qualified withdrawals, SWP, ABLE)
Plans / Custodians Covered	(e.g., NYD, NYA, NYB, MID, MND)
CSR Portal Coverage	/
Member Portal Coverage	/
Entity/Trust Coverage	/ / Planned
Negative Scenarios Included	(Summarize: invalid inputs, timeouts, missing fields, etc.)
Database Validations	Yes / No (explain how verified)
Cross-Plan Compatibility	Yes / Partial / Planned

3. Execution Summary

Metric	Value
Total Test Cases	e.g., 12
Total Scenarios (Methods)	e.g., 80
Execution Duration	e.g., ~10 hrs
Pass Count	e.g., 78
Fail Count	e.g., 2
Execution Rate (Pass %)	e.g., 97.5 %

Total Coverage %	e.g., ~98 %
Tags Used	@regression, @dailyrun
Runner Type	TestNG + Cucumber (Parallel/Sequential)

4. Environment Details

Environment	Details
Stage / Instance	Stage1
Dependency / Integration	AD, DB connectivity, CSR login credentials
Data Source	Oracle Stage DB / CSV
External System Dependencies	(e.g., Sardine, EPP, MFA/OTP Service)
Post-Refresh Impact	None / Low / Medium (explain)

5. Defects and Known Issues

Issue / Failure	Root Cause	Impact	Action Plan	Target Fix Date
Example: AO Partial Mismatch	Timing delay in DB sync	Low	Add retry and post-submit validation	Nov-25
Example: MFA Timeout	Token expiry too short	Low	Implement token auto-refresh hook	Dec-25

6. Observations and Recommendations

- Brief bullet points on suite stability, parallel optimization, environment readiness, etc.
- Mention any recurring flakiness or upcoming migration work.
- Example:
 - "Stable for nightly execution; 95–98 % success rate."
 - "Requires qTest integration mapping for traceability."
 - "Prime V3 migration planned for Jan 2026."

7. Sign-Off Summary

Criteria	Status	Remarks
Test Execution Completed		All test cases executed successfully
Coverage Meets Acceptance Criteria		>90 % coverage achieved
Known Issues Documented		Low-impact intermittent failures logged
Environment Stable		No dependency failures observed
Approval Recommended		Module ready for official sign-off

8. Signatures

Role	Name	Signature / Approval Date
Prepared By	Swapnil Patil	_____
Reviewed By	Henry Dittmer	_____
Approved By	Rajib Akhter	_____
SME / Chapter Lead	_____	_____

9. Attachments / References

- Confluence Link (details about the module regression suite)

- TestNG report (HTML)
- Jenkins execution logs
- qTest report link
- Associated JIRA ticket(s)
- Confluence reference page
- Supporting screenshots (if applicable)

Template Usage:

- Copy this template as a Word document (or Confluence page).
- Fill out per module using your regression data and metrics.
- Once filled, export as PDF and send for **sign-off** to Henry and Rajib.
- Store final approved versions under SharePoint location(TBD)
