

Automation Regression Suite – Master Overview

Purpose

This page is the **documentation hub** for the nightly automation regression program.

The **Automation Regression Suite** serves as the central repository for all regression testing initiatives under the **Unite (Prime)** platforms — including **Prime Version 2 (Legacy Jenkins-based)** and **Prime Version 3 (Modern GitLab-based)** frameworks.

It ensures **end-to-end validation**, **cross-plan coverage**, and **continuous integration stability** across all 529, ABLE, and CSR systems, while enabling visibility into **daily automation health, coverage, and evolution**.

Framework Evolution

Version	Framework Stack	Pipeline / CI	Artifact Repo	Reporting	Status
Prime V2	Java + Selenium + TestNG	Jenkins	Shared Reports (Stage1)	TestNG HTML + qTest	Active (Daily)
Prime V3	Java + Selenium + Cucumber + Maven	GitLab CI/CD	Nexus	Allure + TestNG	Setup Phase (UE Projects)

Structure

Automation Regression Suite

- 1 Unite / Prime V2 Regression Suite - Overview
 - Enrollment - Automation Regression Suite (Prime V2)
 - Legacy Web Registration - Automation Regression Suite (Prime V2)
 - Legacy Web Login - Automation Regression Suite (Prime V2)
 - CSR Account Maintenance - Automation Regression Suite (Prime V2)
 - Contributions - Automation Regression Suite (Prime V2)
 - Make a Withdrawal - Automation Regression Suite (Prime V2)
 - Balance Page - Automation Regression Suite (Prime V2)
 - Sardine Regression - Automation Regression Suite (Prime V2)
- 2 Unite / Prime V3 Regression Suite - Overview
 - Universal Enrollment Regression Coverage - Prime V3
 - Automation Regression Suite - Daily Validation Guide

Regression Snapshot

Suite	Modules	Execution Mode	Run Frequency	Reports	Coverage
Prime V2	8	Jenkins CI	Daily @ 1 AM EST	TestNG + qTest	~95% of core 529 flows
Prime V3	(Expanding)	GitLab CI	Scheduled (UE Projects)	Allure + TestNG	Initial rollout (~40%)

1. Prime V2 – Nightly regression (Stage 1)

1.0 Overview & program docs

#	Document	Purpose
0	1. Unite/Prime V2 Regression Suite – Overview	Purpose, environment, schedule, module summary
1	Prime V2 – Module-by-Module Coverage	Per-module coverage, tags, counts
2	Prime V2 – Suite, Job & Pipeline Details	TestNG XML, Jenkins, smoke/release/weekly

1.1–1.14 Per-module Confluence pages

#	Page	Module
---	------	--------

01	1. Enrollment - Automation Coverage Details (Prime Version 2)	Enrollment
02	2. Legacy Web Registration – Automation Regression Suite (Prime Version 2)	Legacy Web Registration
03	3. Legacy Web Login – Automation Regression Suite (Prime Version 2)	Legacy Web Login
04	4. CSR Account Maintenance – Automation Regression Suite (Prime Version 2)	CSR Account Maintenance
05	5. Contributions – Automation Regression Suite (Prime Version 2)	Contributions
06	6. Make a Withdrawal – Automation Regression Suite (Prime Version 2)	Withdrawals
07	7. Balance Page – Automation Regression Suite (Prime Version 2)	Account Balance Page
08	8. Sardine Regression – Automation Regression Suite (Prime Version 2)	Sardine Regression
09	TODO: Investment Option (Exchange + Fund Allocation)	Investment Options
10	TODO: Transfer	Transfer
11	TODO: Empower Plan Conversion	Empower Plan
12	TODO: Smoke	Smoke Suite
13	TODO: Release Suite	Release gate suites
14	TODO: Stage 5/2/QC4/CAT Smoke Test Suite	Smoke suites

2. Prime V3 – Stage 1 front office (UE + IDP)

2.0 Parent & child pages (current)

Role	Document
Parent (combined overview, pipeline, metrics)	2. Unite / Prime V3 Regression Suite Overview (IDP Login + Universal Enrollment)
Child – IDP Login	1. Universal Enrollment – Automation Regression Suite (Prime Version 3, Stage 1)
Child – Universal Enrollment	2. IDP Login – Automation Regression Suite (Prime Version 3, Stage 1)

Coverage Highlights

Prime V2

- Legacy 529/Unite + ABLE automation coverage across enrollment, contribution, withdrawal, and maintenance.
- Regression health maintained via Jenkins pipelines, qTest dashboards, and environment-ready data sets.

Prime V3

- Unified UE (Universal Enrollment) + IDP Login flow automation framework with Maven + GitLab integration.
- Supports artifact versioning, Nexus build management, and modularized feature-based execution.

Key Benefits

- **Unified Visibility:** One-stop hub for both Prime versions.
- **Traceability:** Links TestNG XMLs GitLab/Jenkins qTest Dashboards.
- **Scalability:** Easily extendable for future modules (Performance, API, Astro).
- **Governance:** Maintains consistent documentation and release-readiness across frameworks.
