

Sprint Planning - 2026-04-13

Sprint Planning Description

From Scrum Guide: Sprint Planning initiates the Sprint by laying out the work to be performed for the Sprint. This resulting plan is created by the collaborative work of the entire Scrum Team. The Product Owner ensures that attendees are prepared to discuss the most important Product Backlog items and how they map to the Product Goal. The Scrum Team may also invite other people to attend Sprint Planning to provide advice.

Sprint Planning - General Steps

Inputs

- ✓ Any retro topics that might roll into Planning
- ✓ Close out last Sprint, review completion of last sprint's goals
- ✓ Review Metrics: Velocity, cycle time, burn up
- ✓ Capacity, coverage for holidays, etc

Topic One: Why is this Sprint valuable?

From Scrum Guide: The Product Owner proposes how the product could increase its value and utility in the current Sprint. The whole Scrum Team then collaborates to define a Sprint Goal that communicates why the Sprint is valuable to stakeholders. The Sprint Goal must be finalized prior to the end of Sprint Planning.

- ✓ Sprint Goal for upcoming sprint
- ✓ Based on Sprint Goal, do we need to set any expectations with stakeholders?

Topic Two: What can be Done this Sprint?

From Scrum Guide: Through discussion with the Product Owner, the Developers select items from the Product Backlog to include in the current Sprint. The Scrum Team may refine these items during this process, which increases understanding and confidence. Selecting how much can be completed within a Sprint may be challenging. However, the more the Developers know about their past performance, their upcoming capacity, and their Definition of Done, the more confident they will be in their Sprint forecasts.

- ✓ Pull stories into Sprint
- ✓ Point stories, if necessary
- ✓ Discuss QE design and effort for each story, as needed
- ✓ Prioritize Stories
- ✓ Revisit Sprint Goal
- ✓ Is there a release in this sprint? If so, add a story to the backlog.

Topic Three: How will the chosen work get done?

From Scrum Guide: For each selected Product Backlog item, the Developers plan the work necessary to create an Increment that meets the Definition of Done. This is often done by decomposing Product Backlog items into smaller work items of one day or less. How this is done is at the sole discretion of the Developers. No one else tells them how to turn Product Backlog items into Increments of value.

- ✓ Task out stories
- ✓ Update Dependencies plus remediation plans
- ✓ Other: Review DCAF Roadmap

Topic Four: Sprint Review

From Scrum Guide: The purpose of the Sprint Review is to inspect the outcome of the Sprint and determine future adaptations. The Scrum Team presents the results of their work to key stakeholders and progress toward the Product Goal is discussed. During the event, the Scrum Team and stakeholders review what was accomplished in the Sprint and what has changed in their environment. Based on this information, attendees collaborate on what to do next.

- ✓ Discuss agenda, prepare presentation, determine presenters
 - Past Sprint Overview + Share out

- Demo (if applicable)
- Look Ahead - what is in the upcoming sprint, call out dependencies, pro releases
- Burn up/Metrics?
- Q & A

Output

From Scrum Guide: The Sprint Goal, the Product Backlog items selected for the Sprint, plus the plan for delivering them are together referred to as the Sprint Backlog.

- ☒ Sprint Backlog
- ☒ Updated Dependencies
- ☒ Sprint Review Plan
