

2. Automation Bug Resolution: Follow-Up Process & Resolution Notification

Page is about?

Purpose:

Once a bug is detected, root-caused, and resolved—**automation, communication, and CI/CD restoration** steps must follow a structured process to ensure full visibility, accountability, and stability.

Steps to Follow After Issue Is Resolved

1. Fix Confirmation

- Dev team fixes or reverts change(s).
- QA team:
 - Reruns only impacted scenarios locally.
 - If fixed unlock main branches.
 - Full regression optional; not a blocker.

2. Update JIRA

- Update the status of the bug in JIRA to "Resolved" or "Closed" with the RCA.
- Add regression rerun notes and attach updated logs if needed.

3. Unlock Main Branch

- Once stability is confirmed, remove the temporary branch lock (if enforced).
- Send the update email to appropriate audience

Resolution Notification Email Template

Subject: Resolved – Daily Regression Passed | [Module/Feature Name] | [Environment]

Message Body Draft:

Hello All,

The previously reported issue related to **[Module/Feature]** in **[Environment]** has been resolved and confirmed through successful regression rerun.

Original Bug Summary:

- **Bug:** [JIRA Link]
- **Failure Area:** [Step/Scenario]
- **Environment:** Stage1 / QC4 / QA
- **Reported On:** [Bug Creation Date]

Resolution Summary:

- **Root cause:** [Short description – e.g., missing config, code defect, infra timeout]
- **Fix implemented by:** [Developer Name / Team]
- **Verified via:** [Manual rerun / Jenkins pipeline run]
- **Branch status:** Main branch unlocked and automation resumed
- **Note:** [any Note]

Thank you all for your support and collaboration in identifying and resolving this issue.

Best regards,

Automation QA Team

Reminder – Distribution List for Resolution Updates

- **Recipients:**

- To: [AGS Tech Leads](#), [AGS Chapter Leads](#), [AGS Development](#), [Brian Danilczyk](#)
- Cc: Henry.Dittmer@ascensus.com, Phuong.Huynh@ascensus.com

***Note:** If **Brian Danilczyk** is out of office, **Valerie Gallegos** will coordinate follow-up actions.*
