

4. Template: Performance Testing Request & Requirement Gathering

When to Use This Page

Use this page when a team is requesting Performance Testing for any feature, release, or application. Please fill out the following fields so the Performance Engineering team can plan and scope the effort.

Request Metadata

Field	Response
Requester Name	<e.g. Tim S>
Request Date	<MM/DD/YYYY>
Team / Feature	<e.g. Employee Portal – MFA Flow>
Target Release	<e.g. April 2025 – Sardine Release>
Point of Contact	<e.g. John Smith>

Performance Goals & SLAs

Field	Response
Target User Load	<e.g. 300 concurrent users>
Target TPS	<e.g. 5 transactions/second>
SLA - Avg Response Time	<e.g. 3 seconds>
SLA - 90th Percentile	<e.g. 5 seconds>
Error Threshold	<e.g. 1% error rate>

Test Scenarios to Cover

- Login
- Dashboard Load
- Enrollment Page
- Investment Transactions
- CSR Search
- APIs (list below)

API Name	Method	Endpoint	Sample Payload
GetUser	GET	/api/user	—
SubmitTxn	POST	/api/txn	—

Test Environment Details

Field	Response
Env URL	< https://env-url.com >
Database	<e.g. Oracle Stage>
Config Parity with Prod?	Yes / No
Data Load Present?	Yes / No

Authentication Type	SSO / LDAP / Token
Rancher Cluster & Namespace	<core-wtrn-dev, ags-qa>

Access & Dependencies

Area	Status	Owner
Rancher Access	Requested	Fresh Service Ticket
DB Access	Not Requested	Dev
New Relic Dashboard	Available	DevOps
Log Access (Splunk)	Requested	QA

Data Strategy

- ☐ Yes Coordinating with DB Team
- ☐ No Will reuse existing data

If YES:

- ☐ Stored Procedures needed?
- ☐ Participant counts (Small/Medium/Large)?
- ☐ Sample queries/scripts attached?

Tool Preference / Execution Plan

Tool	Use?	Notes
JMeter		JMX will be prepared
Taurus		YAML config with CLI
BlazeMeter		External run planned
Jenkins	Optional	For scheduled runs

Timeline & Deadlines

Milestone	Date
Test Planning Complete By	<MM/DD/YYYY>
Environment Ready By	<MM/DD/YYYY>
Execution Start	<MM/DD/YYYY>
Final Report Due	<MM/DD/YYYY>

Final Deliverables Requested

- Executive Summary Report
- Detailed API-wise Analysis
- Environment Recommendations
- Bottleneck Identification
- Before/After Fix Reports

Comments / Notes from Requester

Note for Requester

e.g. "Please coordinate with Johan Smith for Redis lag issue; MFA performance was poor last release"

How to Use This Page (For QA/Business Teams)

1. **Duplicate this page** using the template option.
2. **Fill in each section** with as much detail as possible.
3. Tag your Performance QA contact (e.g. @swapnil.patil).
4. Once submitted, the QA lead will review and confirm next steps.
