

How to Request SQL Server Access & Configure SSMS (IDP/UE Plans – QA Automation)

Overview

QA Automation team members require **SQL Server access** to Stage1 and QC environments for IDP/UE regression and performance testing. Access is requested via **Fresh Service**, and connectivity is established using **SQL Server Management Studio (SSMS)**.

Step 1: Raise SQL Server Access Request

Use this Fresh Service form: [SQL Server Access – Fresh Service Catalog](#)

Fields to Fill:

Field	Value / Instruction
Action Needed	Add
AD Account/User ID	Your AD ID (e.g., swpatil)
System Environment Needed	Stage1 and/or QC
Database Server Name	- GWTQMSSQL02.rsd.crumprsd.com (Stage1) - GWTQMSSQL01.rsd.crumprsd.com (QC)
Application Level Account	Yes
Database Name	- AGSAuthStage1 (Stage1) - AGSAuthQC4, AGSAuthQC1 (QC)
Type of Access Needed	Database Reader and Database Writer
Business Justification	(Copy below)

Business Justification (Copy & Paste)

Requesting SQL Server access to support QA Automation and IDP/UE regression testing.

Environment: Stage1 and QC
Servers: [GWTQMSSQL02.rsd.crumprsd.com](#), [GWTQMSSQL01.rsd.crumprsd.com](#)
Databases: AGSAuthStage1, AGSAuthQC4, AGSAuthQC1
Username: [Your AD ID]
Mirror Access: Nick Botvinnik

This access is required for validating test data, creating/updating automation test cases, and supporting execution of regression and performance testing for IDP/UE plans.

Step 2: Install SQL Server Management Studio (SSMS)

Download & Install

1. Go to Microsoft's SSMS download page: [Download SSMS](#)
2. Direct link to installer: [Download Setup](#)
3. Run the installer and follow the on-screen instructions.
 - Select **Default options** (sufficient for QA needs).
 - Once installed, restart your system (if prompted).

Step 3: Configure SQL Server Connection

Stage1 Database (Regression)

- **Server name:** [GWTQMSSQL02.rsd.crumprsd.com](#)
- **Authentication:** Windows Authentication
- **User name:** RSD\[Your AD ID]
- **Encryption:** Optional (Enable "Trust server certificate")

QC Database (Test/Validation)

- **Server name:** [GWTQMSSQL01.rsd.crumprsd.com](https://www.rsd.crumprsd.com)
- **Authentication:** Windows Authentication
- **User name:** RSD\[Your AD ID]
- **Encryption:** Optional (Enable "Trust server certificate")
