

06a. ** DRAFT: QA Automation Testing Workflow – Full Lifecycle Guide

Page is about?

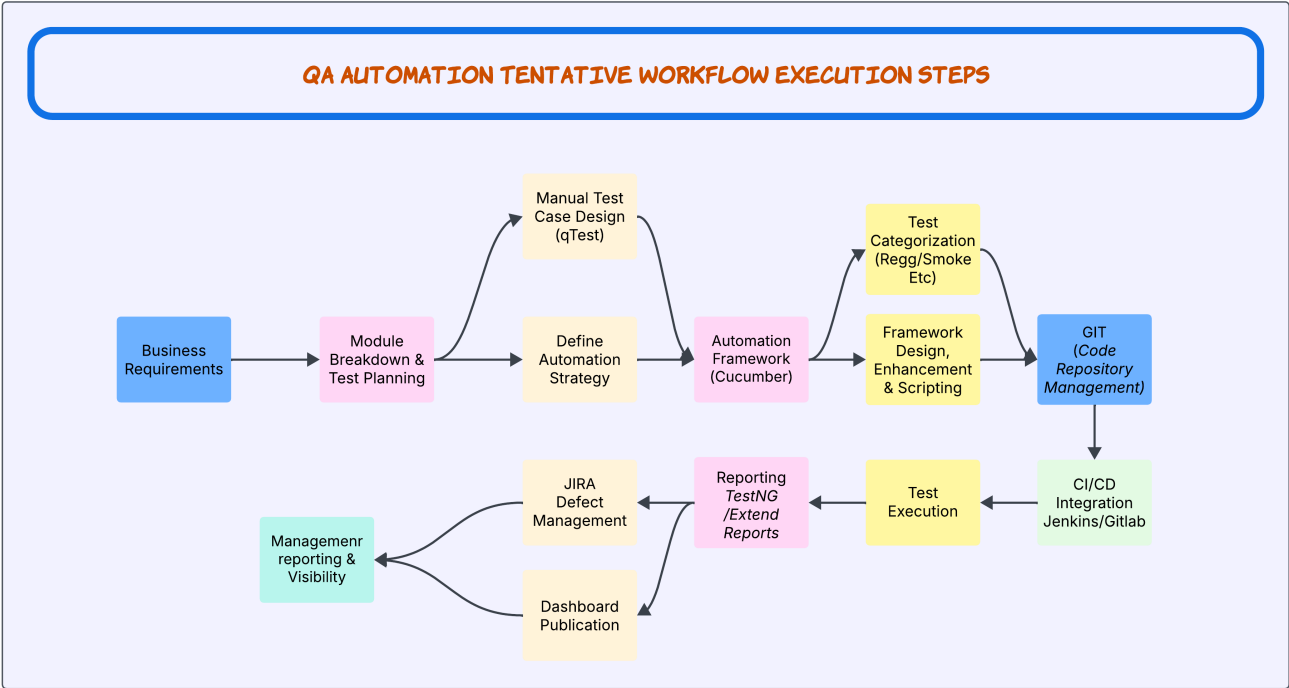

Purpose of This Page:

This page documents the **complete automation workflow** from business requirement to execution, reporting, and visibility. It provides **traceability across qTest, GitLab, Jenkins, TestNG, Allure, and JIRA**, and is designed to help both **technical and non-technical stakeholders** visualize progress and ownership.

Ideal for QA Leads, SDETs, Dev Managers, and Product Owners

Enables traceability, reporting, and decision-making across sprints and test phases

End-to-End Automation Testing Workflow

Step-by-Step Breakdown

Step	Stage	Tools/Deliverables	Status	Owner
1	Business Requirements	AHA / JIRA BRD	Complete	PO / BA / QA Lead
2	Module Breakdown	Feature Matrix, Priority Mapping	Complete	QA Lead
3	Manual Test Design	qTest Manual TC, Categorized	Ongoing	Automation QA
4	Define Automation Strategy	POM / BDD / DDT etc.	Ongoing	Automation Lead
5	Automation Framework Setup	Cucumber, TestNG, Maven	Ongoing	SDET/ Automation QA
6	Test Categorization	Smoke / Regression / API	In Progress	QA Lead
7	Script Development	Java + Selenium + RestAssured	In Progress	SDET/Automation QA
8	GitLab Integration	Feature Branch Merge Req	Ongoing	SDET/Automation QA
9	CI/CD Pipeline	Jenkins Jobs: Smoke, Regression	Configured	DevOps & QA Lead

	Test Execution	Profiles + Maven Suite XMLs	Configured	QA
.1	Reporting	Allure, ExtentReports	Ongoing	QA
.2	Defect Logging	JIRA Integration	Configured	QA
.3	Dashboards + Confluence	Execution Dashboard, Status KPIs	Planned	QA Lead

Mapping Sample: Test Case Automation Execution (CICD)

qTest ID	Category	Automation Script Mapping	CI Job (<i>Jenkins/Gitlab</i>)	Reporting	JIRA Defect
TC-10001	Smoke	LoginTest.java	smoke-login-job	TestNG + JIRA	QA-2345
TC-20002	Regression	PasswordResetTest.java	regression-all	Extent	QA-2376
TC-30003	API	EnrollmentAPI.java	api-pipeline	TestNG XML	-

Dashboards You Can Build

Dashboard Page	Audience	Highlights
QA Execution Dashboard	QA Leads, Team	Pass %, # of tests, flaky tests, severity mapping
Release/Sprint/Test Coverage	PM, PO, Scrum Master	Story vs Test Case Traceability, Automation %
Defect Trends	QA + Dev	Bug status, Priority, Root cause
Defect Leakage	Director	Prod vs QA defect %, Root Cause Areas
Velocity by Module	Managers	Time-to-automate, coverage per epic/module

Confluence Dashboard Widgets (Recommended)

- **Embed Dashboards** (Use iframe plugin or image snapshot) like Test NG/Extend Report.
- **JIRA Filter Gadget**: Show open defects, test execution status
- **qTest Manual Test Summary Table**: Export/Import via Excel
- **Release-wise Execution KPIs**: Week-over-week trend

Visibility + Traceability Recommendations

- Use **qTest JIRA** integration to auto-link stories & test cases, Use qTest Insight for reporting
- Mark qTest fields: Manual/Automated, Status, Execution Owner
- Auto-email **Allure/Extent** reports post CI run via Jenkins
- Embed **Jira Filter Gadgets** & Allure reports into Confluence dashboards
- Update Test Summary pages weekly for leadership syncs
- Auto create Jira defects when regression fails & notify using teams channel
