

3. Legacy Web Login – Automation Regression Suite (Prime Version 2)

What's Included

Purpose:

This module validates legacy (non-IDP) member login flows across multiple plans. It covers positive and negative login, forgot username (positive/negative), forgot password (positive), and CSR password update so non-IDP users have secure access to the portal.

Commented out in XML (not run): Legacy(Non-IDP) Member Login - Forgot Password - Negative Test Case.

What's covered

- **Member login – positive:** Legacy (non-IDP) login success (MID, CAD, COD, OKD, RIB, PAB, COB).
- **Member login – negative:** Invalid credentials, login page validation (same plans).
- **ABLE member login:** RIB, PAB, COB – positive and negative.
- **Forgot username:** Positive (until email send) and negative for MID and OKD.
- **Forgot password:** Positive for MID. (Forgot password negative is commented out in suite.)
- **CSR password update:** Covered via login flow (e.g. positive login scenarios).

Notes

- **19 test blocks** in suite XML; **27 methods** (scenarios) in latest HTML report.
- **Labeling mismatch:** Suite name in XML and HTML is "Regression Test Suite - Legacy Web Registration"; the suite runs **login** flows (stage1-web-login.xml). Keep this in mind when searching reports.
- **Module & plan coverage:** Fill *Scenario count* and *qTest mapping* from the latest TestNG report and qTest/Confluence when updating this page.
- All tests use **FeatureRunner** (thread-count 1). Forgot Password Negative is commented out in XML.
