

1. Unite/Prime V2 Regression Suite – Overview

Page is about?

Purpose

This page provides a **centralized summary** of the Unite Regression Automation Suite currently executed daily in **Stage 1**. It outlines what modules and plans are automated, how they run via **Jenkins + TestNG + qTest**, and overall coverage across member, CSR, advisor, and ABLE workflows.

Goal: enable visibility, traceability, and ownership for daily automation regressions executed under Prime Version 2.

Owner	QA Automation Team
Environment	Stage 1
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
TestNG Reports	View Latest HTML Reports
qTest Dashboard	Regression Execution Dashboard
Process Reference	Automation Naming + Tagging Standards

What’s Included in the Suite

Item	Details
Total Modules	8 core modules automated across 529, Advisor, ABLE, and CSR flows
Automated Tests	70 + scenarios executed daily across multiple plans
Plans Covered	NYD, NYA, NYB, MID, MND, ILB, MIA, AKB, CAD, TNB, PAB (extended)
Execution Layers	Daily Stage 1 run via Jenkins (Mon–Fri)
Automation Coverage	@regression, @dailyrun, @smoke, @functional
Reporting Tools	qTest Regression Dashboard + TestNG Jenkins Reports

Regression Tracking Table

#	Module / Feature	Plans Covered	Status	Env	Run Type	qTest	TestNG Path / Confluence Link
1	Enrollment – Automation Coverage Overview	NYD, MID, NYA, NYB, AKB	Enabled	Stage 1	Daily		bin/regression/daily/stage1-enrollments.xml
2	Legacy Web Registration – Automation Coverage	NYD, NYA, MID, MIA	Enabled	Stage 1	Daily		bin/regression/daily/stage1-web-registration.xml
3	Legacy Web Login – Automation Coverage	NYB, AKB	Enabled	Stage 1	Daily		bin/regression/daily/stage1-web-login.xml
4	CSR Account Maintenance – Automation Coverage	AKB, NYB	Enabled	Stage 1	Daily		bin/regression/daily/stage1-csr-acct-maintenance.xml
5	Make a Contribution – Automation Coverage	NYD, NYB	Enabled	Stage 1	Daily		bin/regression/daily/stage1-acct-overview.xml
6	Make a Withdrawal – Automation Coverage	NYB, AKB	Enabled	Stage 1	Daily		bin/regression/daily/stage1-withdrawals.xml
7	Balance Page – Automation Coverage	All Plans	Enabled	Stage 1	Daily		bin/regression/daily/stage1-contributions.xml
8	Sardine Regression – Automation Coverage	CAD, TNB, PAB, PAG, PAD, VGI, NYD, MID	Enabled	Stage 1	Daily		bin/regression/daily/stage1-sardine-regression.xml

Daily Execution Flow

Step	Description
1	Jenkins job triggered automatically at 12:00 AM EST (Mon–Fri).

2	Executes Selenium + TestNG from GitLab main branch for Prime V2 codebase.
3	Results auto-pushed to TestNG dashboard + qTest dashboard .
4	Failures logged to JIRA and reviewed under CI lock policy before 10 AM EST.
5	Branch lock and revert governed by Fail-Safe Protocol for stability.

Best Practices & Governance

Area	Practice
Folder Structure	Unified under project-specific runners and plan folders.
Tagging Convention	@regression, @smoke, @functional, @dailyrun.
Coverage Tracking	Synced to qTest via Regression Dashboard.
Branch Strategy	CI/CD merge requests only after successful daily regression.
Reporting	Auto export of TestNG HTML reports and qTest sync.
Flakiness Policy	Failed tests triaged before next run; unstable cases quarantined.

Key Highlights

- **Withdrawals Suite Added** covering qualified & non-qualified flows.
- **MFA enabled tests** implemented for Login and Withdrawal modules.
- **Unified Execution** via central Stage 1 Jenkins pipeline.
- **qTest and TestNG integration** for traceability and reporting.
- **Flakiness Tracking** and Fail-Safe protocol maintained for CI stability.

Next Steps / Planned Expansions

- Extend coverage to **new plans (MA, FL, CA)**.
- Add **release-specific smoke and performance suites**.
- Build **Astro and SFRP baseline pipelines** for 2026.
- Continue standardizing test data provisioning and auto-retry framework.
