

4. CSR Account Maintenance – Automation Regression Suite (Prime Version 2)

What's Included

Purpose:

This page documents the complete **Contributions Automation Regression Suite**, which validates both **CSR and Member Contribution workflows** across multiple plan types — including **Direct (IDP)**, **Advisor**, and **ABLE (Non-IDP)** — within **Prime Version 2 Unite Pipeline**

1. Execution Summary (Latest Run)

Attribute	Details
Owner	QA Automation Team
Environment	Stage 1
Suite Name	Regression Test Suite – CSR Account or Profile Maintenance
Suite File	stage1-csr-acct-maintenance.xml
Framework Version	Prime Version 2
Test Type	Cucumber-based E2E Functional Regression
Execution Time	Daily @ 1:00 AM EST (via Jenkins)
Framework Tools	TestNG + Cucumber + Selenium
Tags	@regression, @dailyrun
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
Reports	TestNG HTML Reports
Total Tests (TestNG)	16
Total Scenarios (Cucumber Methods)	26
Passed	26
Failed	0
Success Rate	100%
Execution Time	~3.5 hours

2. What This Module Covers

This suite validates **all CSR-driven Account / Profile Maintenance workflows** across **IDP**, **Non-IDP**, **Advisor**, and **ABLE** plans:

- Personal Information (Address, Phone, Email)
- Bank Information (Add / Edit / Delete)
- Beneficiary Maintenance
- Delivery Preferences
- Security Questions
- Payroll Deduction

All flows include: **CSR Login** **Pull Account** **CSR Member Jump** **Update** **DB Validation**.

3. End-to-End Steps Validated by Automation

Same set of steps for every plan, every feature (your new standard):

1. Start browser + load test cases
2. Establish Unite DB connection
3. Login using CSR credentials
4. Pull account information (plan-specific)
5. Jump from CSR to Member account

6. Navigate to respective profile section
7. Perform update (Add/Edit/Delete/Change)
8. Confirm update in UI
9. Validate DB and UI consistency
10. Log out / teardown

4. Module & Plan Coverage (Unified Table With ABLE Column)

Feature / Module	NYD	NJD	KSD	NYA	ILB (ABLE)	AKB (ABLE)	NYB (ABLE)	Notes
Personal Information								Address, phone, email updates
Bank Information – Add		—						Add bank account + DB validation
Bank Information – Edit		—						Routing/Account number updates
Bank Information – Delete		—						Delete + post-delete validation
Beneficiary Maintenance		—	—	—	—	—	—	NYD-only as per business rules
Delivery Preferences		—	—	—	—	—	—	Updates for paper/e-delivery
Security Questions	—	—		—	—	—	—	KSD-only legacy workflow
Payroll Deduction		—	—	—	—	—	—	Add/update/delete payroll setup

ABLE Plans Covered:

- ILB
- AKB
- NYB

(All three validated in **Personal Info** + **Bank Info** sections.)

5. Execution Summary Table

Item	Details
Suite Path	/qa-automation/unite/bin/regression/daily/stage1-csr-acct-maintenance.xml
Feature Files Used	PersonalInformation.feature, BankInformation.feature, Beneficiary.feature, DeliveryPreference.feature, SecurityQuestions.feature, PayrollDeduction.feature
Plans Covered	NYD, NJD, KSD, NYA, ILB, AKB, NYB
Total Test Classes	16
Total Methods (Scenarios)	26
Pass/Fail	26 / 0 (100%)
Flaky Case	if Security Question are not editable then throw exception on purpose, Backlog item added to Jira to handle this situation
Impact on Stage1 Refresh	None — suite stable

6. Flaky / Known Issues

Issue	Impact	Status
Occasionally Security Que Edit is missing (Due to user level access so SQL needs to be altered)	Security Question edit TC will fail	Backlog story logged
Occasional long runtime on Personal Info flows	Data load takes 5–8 mins for NYD/NYA	Acceptable; retry logic will be fine

7. Next Steps (V3 Alignment)

Area	Action
Member Self-Service Profile Updates - Missing right now	Implement as part of Prime V3
Negative Paths	Add invalid data, missing fields, duplicate email validations

Entity Accounts	Future addition (Trust / Organization)
Parallel Execution	Expand for bank + payroll flows to reduce cycle time
