

5. Contributions – Automation Regression Suite (Prime Version 2)

What's Included

Purpose

This page documents the complete **Contributions Automation Regression Suite**, which validates both **CSR and Member Contribution workflows** across multiple plan types — including **Direct (IDP)**, **Advisor**, and **ABLE (Non-IDP)** — within **Prime Version 2 Unite Pipeline**.

It ensures full regression coverage for:

- **One-time contributions** (via existing/new bank and multiple beneficiaries)
- **Recurring AIP contributions** (Add/Edit/Delete)

Suite Information

Attribute	Details
Owner	QA Automation Team
Environment	Stage 1
Suite Name	Regression Test Suite – Contributions
Suite File	/qa-automation/unite/bin/regression/daily/stage1-contributions.xml
Framework Version	Prime Version 2
Test Type	Cucumber-based E2E Functional Regression
Execution Time	Daily @ 1:00 AM EST
Framework Tools	TestNG + Cucumber + Selenium
Tags	@regression, @dailyrun, @ablerun
Jenkins Job	STAGE1-Daily-Unite-Prime-Regression
Reports	TestNG HTML Reports
qTest Dashboards	qTest Execution – AIP

Execution Summary

Metric	Count / Status
Total Tests	15
Total Methods (Scenarios)	49
Plans Covered	NYD, NYA, NYB, MID
Execution Duration	~9 hours
Runner Type	FeatureRunner
Feature Files	7

Module & Plan Coverage

Plan(s)	Feature File / Test Class	Functional Area	Scenarios (Methods)	Tags
NYD (Direct – IDP)	MemberSingleContribution.feature	Single EBT Contribution	3	@regression, @dailyrun

NYA (Advisor – Non-IDP)	MemberSingleContribution.feature	Single EBT Contribution	3	@regression, @dailyrun
NYB (ABLE – Non-IDP)	AbleMemberSingleContribution.feature	ABLE EBT Contribution	1	@regression, @dailyrun
NYD / MID / NYA / NYB	AIPContribution.feature	AIP Recurring Contribution	16	@regression, @dailyrun
NYD / MID / NYA / NYB	AIPAddEditDeleteNonCustom.feature	AIP Add/Edit/Delete (Non-Custom Plans)	8	@regression, @dailyrun
NYA	AIPAddEditDelete.feature	AIP Add/Edit/Delete (Custom Plans)	1	@regression, @dailyrun
NYD / MID / NYA	MemberContributionNegative.feature	Negative Scenario Validation	17	@regression, @dailyrun

Scenario Breakdown (49 Methods Executed)

#	Scenario Name	Feature File	Flow Type
1	Perform member single contribution for EBT – Existing Bank	MemberSingleContribution.feature	CSR One-Time Contribution
2	Perform member single contribution for EBT – New Bank (Savings)	MemberSingleContribution.feature	CSR One-Time Contribution
3	Perform member single contribution for EBT – Multiple Beneficiaries	MemberSingleContribution.feature	Multi-beneficiary One-Time
4	Able Member Single Contribution for EBT – Existing Bank	AbleMemberSingleContribution.feature	ABLE EBT Contribution
5	Perform CSR AIP contribution – New Bank (Checking)	AIPContribution.feature	CSR Recurring AIP
6	Perform CSR AIP contribution – New Bank (Savings)	AIPContribution.feature	CSR Recurring AIP
7	Perform CSR AIP contribution – Existing Bank	AIPContribution.feature	CSR Recurring AIP
8	Perform CSR AIP contribution – Multiple Beneficiaries	AIPContribution.feature	CSR Recurring AIP
9	Perform AIP Add/Edit (Non-Custom – Direct IDP)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
10	Perform AIP Add/Delete (Non-Custom – Direct IDP)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
11	Perform AIP Add/Edit (Non-Custom – MI Direct)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
12	Perform AIP Add/Delete (Non-Custom – MI Direct)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
13	Perform AIP Add/Edit (Non-Custom – NY Able)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
14	Perform AIP Add/Delete (Non-Custom – NY Able)	AIPAddEditDeleteNonCustom.feature	CSR AIP Maintenance
15	Perform AIP Add/Edit (Custom – NY Advisor)	AIPAddEditDelete.feature	CSR AIP Custom Plans
16	Validate “Electronically” radio selection	MemberContributionNegative.feature	Negative Flow
17	Validate beneficiary selection error	MemberContributionNegative.feature	Negative Flow
18	Validate dollar amount missing entry	MemberContributionNegative.feature	Negative Flow
19	Validate recurring frequency input	MemberContributionNegative.feature	Negative Flow
20	Validate EBT Initiated Date entry	MemberContributionNegative.feature	Negative Flow
21	Validate contribution type selection	MemberContributionNegative.feature	Negative Flow
...	(Remaining Negative Scenarios follow similar validations across NYD, MID, NYA)		

Automation Highlights

- Fully automated CSR Contribution flows — **Single + Recurring + Negative** scenarios.
- Covers **Direct, Advisor, and ABLE** plans across **IDP & Non-IDP** tiers.
- **DB and UI validations** performed for every successful transaction.
- **End-to-End workflow** from contribution initiation validation confirmation page.
- Integrated with **qTest** for traceability and nightly **Jenkins** regression runs.
- Uses **FeatureRunner** for serial execution and `@regression` tagging for scheduling.

Observations / Current Issues

Area	Observation / Status
AIP Contribution (NYD)	Failed due to <i>maximum contribution limit reached</i> (business rule; not defect).
Beneficiary Selection	Two failed validations for beneficiary account selection; UI field sync issue under review.
Execution Time	Suite runtime exceeds 9 hrs; parallelization optimization planned.

qTest Reporting	Partial logging – only 2 test cases currently visible; needs sync.
-----------------	--

Recommendations & Next Steps

- **Extend coverage** to remaining plans: WVD, IND, ILB, UE.
- **Add negative scenarios** for maximum contribution limit and invalid bank entries.
- **Integrate retry logic** for flaky AIP tests.
- **Add CSR portal test data automation** for recurring contribution setup.
- **Enhance reporting sync** between Jenkins qTest for real-time traceability.

Maintenance Guidelines

Frequency	Owner	Action
Daily	QA Automation Team	Monitor Jenkins job, validate HTML reports.
Weekly	Lead SDET	Review failed AIP/Beneficiary cases and re-trigger.
Monthly	QA Lead / PSDET	Update qTest mappings, verify plan coverage.
Quarterly	QA Architect	Extend automation scope for new states/plans.
