Runner Classes

Class	Package	Usage
FeatureRunner	com.cs529.qa.prim.runner	Sequential execution; used for smaller or dependency-sensitive tests
ParallelFeatureRunner	com.cs529.qa.prim.runner	Parallel execution within a test; used for larger modules (enrollment, balance, sardine, empower)

HTML Reports – Where They Come From

HTML reports are generated by TestNG as part of Jenkins execution. They are located at:

10_IMPORTS_RAW/AM_Regression_Reports/Regression Test Suite - <Module> {1,2,3}.html

Each module has 3 HTML files — these are **different views/pages of the same execution** (not different runs). The `_files/` folders contain supporting CSS, JS, and images.

Modules with reports: Enrollments, Legacy Web Login, Legacy Web Registration, Contributions, Account or Profile Maintenance, Withdrawals, Account Balance Page.

Modules without reports (in this export): Sardine, Investment Options, Empower Plan — TODO: obtain and add.

To refresh: Download from Jenkins job artifacts: STAGE1-Daily-Unite-Prime-Regression last successful build TestNG Results.

Archive Suites (Superseded)

The `daily/Archive/` folder contains 15 older suite XMLs that were replaced when the regression was modularized:

Suite XML	What It Was	Replaced By
